

CLAIMS

1. A thermal transfer image receiving sheet comprising a substrate sheet, an intermediate layer provided on at least one side surface of the substrate sheet and a dye receptor layer provided on the surface of the intermediate layer, wherein the intermediate layer is formed from a chlorinated polypropylene resin.
2. The thermal transfer image receiving sheet as claimed in claim 1, wherein the intermediate layer contains at least one of a white pigment, a filler and a fluorescent brightener.
3. The thermal transfer image receiving sheet as claimed in claim 1, wherein the substrate sheet is made of any one of a pulp paper, a synthetic paper and a synthetic resin film.
